

GREEN • HEALTHY • SAFE

The Natural Odor Eliminator

OXYIONTM GENERATOR

Ingeniously produces a balanced proprietary blend of healthy Ions and Activated Oxygen, in the same levels as found in the best of Nature itself, to completely destroy odors and pollutants naturally!

The Only Lasting Byproduct Is Oxygen!

So powerful it can de-scent SKUNK Odor!

The Genuine, Original CatMouseTM - Accept No Lesser, Inferior Imitations!

Congratulations... You have just invested in the ultimate greenest, natural electronic odor eliminator! We invite you to try it out on the most problematic odors in your home including litter boxes, laundry rooms, bathrooms, closets and more. You will be absolutely amazed by the results!

CATMOUSE™ QUICK START OPERATION GUIDE

Please read the entire User Guide/Instruction Booklet before using

1. Plug power cord into bottom of CatMouse™ unit.
2. Plug Power Supply Adapter into suitable wall power outlet.
(add proper extension cord if needed)
3. Mount or place the CatMouse™ in desired elevated location.
4. Push ON/OFF button until green light comes on.
5. Select LOW/HI/BOOST output setting on the top edge of the CatMouse™.
(Please Note: BOOST setting will activate Fan and HI Oxyion™ output to destroy severe odor problems during first 12-24 hours of use.

That's it! Start Enjoying The Odor Free, Clean & Green Life!

CATMOUSE™ *Package Contents*

CatMouse™ Oxyion™ Generator

120 VAC Gray
Power Adapter

Hook & Loop Repositionable
Mounting Strips
Wall Anchor & Screw
Mounting Pin

FREE!
Spare Oxyion™ Emitter

The original World's Most Effective & "Greenest" Electronic Odor Eliminator will sniff out and devour your litter box pet odor and all other home odor problems... Instantly, Electronically, Naturally and Safely! Dollar for dollar, nothing on Earth is More Effective, Green, Natural and Economical at Eliminating Odors than the CatMouse.™

Safety Symbol Definitions

The purpose of the safety symbols is to attract your attention to possible dangers. The safety symbols and the explanations with them, deserve your careful attention and understanding. The safety warnings do not, by themselves, eliminate any danger. The instructions or warnings they give are not substitutes for proper accident prevention measures.

SYMBOL MEANING

SAFETY ALERT SYMBOL:

Indicates caution, warning or danger. May be used in conjunction with other symbols or pictographs.

DANGER: Failure to obey a safety warning will result in serious injury or death to yourself or others. Always follow the safety precautions to reduce the risk of fire, electrical shock, and personal injury.

WARNING: Failure to obey a safety warning can result in serious injury to yourself or to others. Always follow the safety precautions to reduce the risk of fire, electrical shock, and personal injury.

CAUTION: Failure to obey a safety warning may result in property damage or personal injury. Always follow the safety precautions to reduce the risk of fire, electrical shock, and personal injury.

NOTE: Advises you of information or instructions vital to the operation or maintenance of the equipment.

DANGER: Keep away from water sources including rain, bathtubs, sinks and pools.

DANGER: Keep away from children. It is not a toy!

DANGER: Do not use in explosive air environments, near gas vapors, or other flammables, etc.

DANGER: Do not place flammables or ignitable items on top of unit.

DANGER: Never place any living thing (including pets) inside a totally closed small container with the CatMouse™ for any extended period of time. Activated Oxygen (O3) is NOT life sustaining as is Oxygen (O2). The CatMouse™ can be safely used in the presence of small animals and humans wherever normal airflow exists.

WARNING: Do not further dismantle the CatMouse™ other than for cleaning the unit as instructed to avoid damage to internal parts.

WARNING: Maintain a distance of at least 24 inches (60.96 cm) from top grill of CatMouse™ if exposed to it continuously for very prolonged periods of time (ie: while sleeping or watching TV, etc.).

WARNING: For individuals with a history of respiratory disease or sensitivity: The CatMouse™ entirely complies with U.S. safety standards for low Activated Oxygen (O3) emission (less than 0.04 ppm, less than typically found in natural fresh, clean outside air). Persons with a history of respiratory disease should seek the advice of their physician regarding possible rare sensitivity to low levels of Activated Oxygen (O3). For the vast majority of individuals, the negative health effects of pollutants, toxins, germs, bacteria, mold, pollen, etc., can be far more intolerable and unhealthy than the brief, minute exposure to nature's own oxidizing pollution fighter.

NOTE: A static electricity sound may be emitted from the CatMouse™ in the event it comes into contact with high levels of humidity. This is NOT a malfunction.

NOTE: Unplug if not used for extended periods of time.

ORGANIC OXYIONS™ the Natural Difference...

Nature invented pollution control eons ago. Every minute of every day, nature produces a measured blend of natural Organic Activated Oxidizing Oxygen - O₃ to keep the Earth from putrefying. Unfortunately, this is too simply, often erroneously and inappropriately referred to as Ozone, as related to its smog removal role. In fact, it is one of nature's greatest cleansing miracles.

The synergistically natural negative ions contained in Oxyions™ naturally and very effectively, oxidize and destroy pollutants, odors, smoke, toxic chemicals, germs, bacteria, viruses, mold, mildew, allergens and volatile organic compounds. The negative ions contained in Organic Oxyions™ also precipitate particulate matter such as dust, pollen and allergens from our daily life giving air supply.

The only remaining byproduct of Organic Oxyions™ is pure Oxygen. No cleanser on Earth is Greener, Safer or more organic.

Nature produces Organic Oxyions™ from lightning, sunshine and aerated water sources such as ocean waves, rain and waterfalls. Organic Oxyions™ are the reason the air, associated with those sources, smells clean, fresh and is so energetically mood lifting. Nothing could be simpler, safer and more natural. It is nature's solution not only to pollution, but to your good health and well being.

We've precisely reproduced this natural phenomenon electronically, with the same production method, proportions and relative quantities as in the best of nature itself, through electric plasma gasification discharge. This precisely crafted and timed high voltage corona spark, is literally "a miniature lightning storm in a box". It is simply, now, small and economical enough to be utilized virtually anywhere, to clean up and deodorize virtually anything, thereby producing a much cleaner, healthier and safer environment for you, your family and your pets.

To replicate nature, our Organic Oxyion™ generators are simply sized and utilized in an area-specific, appropriate space as directed. They conveniently recreate this natural cleansing environment indoors, just as nature does everyday outdoors. Using our Oxyion™ generators in a much smaller space than directed, will result in higher, but perhaps preferably more effective, concentrations for non-occupied spaces, such as lockers, storage bins, shoe boxes etc. When used in larger than recommended areas, the results will produce less effective concentrations.

When used as directed, the Organic Oxyion™ generators will produce the same concentrations as found in the best fresh air that nature creates. Far lower levels of Organic Oxyions™ are present from our generators than after a typical lightning/rain storm. The levels produced are only slightly lower than the levels in the cleanest, freshest air found in nature itself. Organic Oxyion™ generators simply bring the benefits of the freshest outside air...indoors. No need to open dusty windows or the risks and the costs to do so in other than ideal conditions, weather and situations.

BOTTOM LINE...

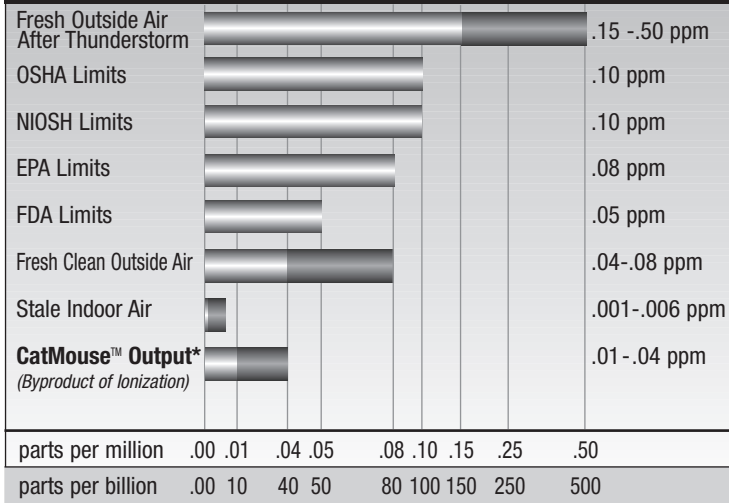

Organic Oxyions™ are simply the safest, most effective, lowest cost and GREENEST deodorizer and cleanser on the planet.

Nature's Balanced OXYIONS™ Composition

Beneficial Mood Lifting, Air Cleaning Ion Levels

Natural Disinfecting Activated Oxygen (O₃) Levels

*CatMouse™ output is regulated to meet government agency limits which are, as shown above, actually far below those found beneficial by nature itself.

OXYIONS™**The Earth's Most "Purrrfect" Greenest Deodorizer**

There's a new natural "GREEN" money-saving odor eater in town and it's declaring war on all ODORS! The Electronic CatMouse™ devours odors and toxic pollutants with Oxyions™ and eventually leaves behind only beneficial, healthy oxygen and healthy ions in the process, just as Nature does everyday! The CatMouse™ meets all regulatory compliance standards.

Thanks to new micro-electronic advances, this powerful commercial grade, natural, deodorizing technology is now available in the low cost, miniature electronic CatMouse™...for use by virtually everyone!

Nature already invented the "Purrrfect" miracle deodorizer eons ago...Oxyions™, a natural balance of Activated Oxygen (O3) and Negative Ions! Just as in Nature, the electronic CatMouse™ produces these natural Oxyions™, to clean the earth's air supply and environment. Without them, we would likely all die of putrefaction from our planet's pollutants, waste, germs, bacteria, molds, viruses, fungi, etc. Now, YOU can harness nature's miracle, safely, right in your own home, with the same beneficial results!

Activated Oxygen (O3) quickly starts to revert to pure Oxygen (O2) in about 30 minutes, eventually leaving no toxic residues or pollutants. Nature's Activated Oxygen (O3) has a half-life of about 30 minutes, meaning it reduces itself by half about every 30 minutes. Initial half-life reduction is fast because the concentrated Activated Oxygen will immediately start attaching itself to pollutants, odors and microorganisms, destroying them in the process. Any "residual Activated Oxygen" will remain and reduce at a slightly slower pace but still, about every 30 minutes.

The CatMouse™ emits Oxyions™ at the same levels as fresh country air. Actually, even fresh clean country air (not polluted city air) can often naturally contain twice the Activated Oxygen levels as the CatMouse™ produces or government regulations typically allow. Opening your windows to let fresh, clean air into your home could,

therefore, exceed regulatory limits! Ridiculous? Yes, once you know the facts. Remember these are the same regulatory government agencies that convinced you to eat Transfats for decades, not realizing they were up to eight times more likely to clog your arteries than natural butter! Hence the famous comedy line; "I'm from the government and I'm here to help." Their cure is often more harmful than the problem...no thanks big, corporate lobbyists!

In fact, the Activated Oxygen portion is actually Nature's Greenest Miracle disinfectant and deodorizer. It is routinely used commercially to disinfect and deodorize hospitals, commercial kitchens, gyms, hot tubs, drinking water and swimming pools, etc. By law, every bottle of drinking water must be disinfected with it!

Even when dissolved in water, it makes a highly effective and safe disinfectant which is non-toxic, non-staining and works great. Activated Oxygen is 13 times more soluble in water than Oxygen. Activated Oxygen disinfects 3,100 times faster than chlorine bleach! Super oxygenated (ozonated) water stays at full strength for only approximately 15 minutes. The Activated Oxygen then again reverts back to oxygen, leaving no harmful pollutant residuals behind, while having effectively destroyed pathogens (bacteria, viruses, fungi, mold, etc.). Ozonated water is used for safely and instantly cleaning stains from clothes, carpets, upholstery and furniture. It is also effective for sanitizing countertops, vegetables or a multitude of other surfaces, even foods.

Activated Oxygen is also erroneously referred to as ozone pollution. Media ignorance has cast an undeserved negative stigma on nature's environmental purifier by incorrectly naming it as a pollutant like smog. In fact, it is nature's much needed reaction to man-made pollutants, including smog! It destroys the pollutants, then amazingly reverts back to oxygen and clean air. Ozone is much easier to measure than pollutants in the air. Erroneously named

ozone alerts are, therefore, actually pollution alerts! It is nature's response to the need to clean man-made pollutants from our air, not the other way around. Nature's ozone is not the problem—pollution is the problem. Nature's own ozone (air bleach) is the answer to destroying pollution. We couldn't live without it! Just as big Drug Company lobbyists push profitable prescription drugs (killing over 150,000 people per year) and undermine Natural Health, big Chemical Company lobbyists push profitable (but toxic) Chemicals, undermining Nature's existing simple, low cost solutions, such as Nature's own Ozone (O3).

Activated Oxygen has been the only viable, long-term method for removing the most difficult odor problems in nature and commercially. Removing smoke, soot and dead animal cadaver odors from buildings, automobiles and homes, have all been best accomplished with Activated Oxygen. Only Activated Oxygen (O3) can permeate every crack & crevice and attack and chemically alter the odor causing compounds themselves, rendering them inert, ultimately leaving only fresh Oxygen(O2) when its work is done! It's Nature's Greenest Miracle.

If it weren't for the oxidizing power of Nature's Activated Oxygen in Oxyions™, our entire planet would be, in all probability, one putrefied, smelly, toxic, mess! It's Nature's answer to destroying the Earth's pollutants, and now you can own, control and enjoy the many benefits of Nature's Activated Oxygen (O3) miracle anywhere in your own home, easily and inexpensively. You can destroy odors, toxins, bacteria, germs, viruses, molds and more.....all naturally, effectively and safely!

Inexpensive • Compact • Powerful
Safe & Healthy Residual Byproduct - Oxygen
Replaces hundreds of toxic deodorizing & disinfecting
chemical products and their endless pollution & expense!

The CatMouse™ – Nature's own "green" miracle deodorizer is so effective it can de-scent a skunk! If it can do that and eliminate

extremely difficult litter box and pet odors, imagine the hundreds of other uses for this amazing little device in your home! If you can think of it, you can deodorize and disinfect it– with the CatMouse™!

Due to the compact size of the CatMouse™, it is most effective for its designed purpose: cleaning and deodorizing small areas and items. You can disinfect & deodorize virtually any object or area by simply placing the CatMouse™ above, or in close proximity to, it. The CatMouse™ can be placed in large plastic storage boxes, garment bags, shoe boxes, pantries, hope chests, garbage cans, diaper pails, even in small closets. It is also very effective on hamper lids and near the laundry chute! Activated Oxygen is heavier than air and therefore flows downward, so placing the CatMouse™ slightly above the object to be treated is beneficial.

THE FILTHY FACTS

Germs, bacteria and viruses not only threaten us...they can kill!

New scientific evidence is emerging pointing to germs as a link to inflammation–causing heart disease, even cancer.

The typical office desk area has 400 times the amount of bacteria than the average toilet seat. Worst offenders: phones, staplers, keyboards and your computer mouse! Worldwide, money is the filthiest of all items handled, and your wallet is a virtual breeding petri dish for bacteria. Purses and briefcases are also among the dirtiest, worst offenders. These items are routinely set down on the filthiest surfaces imaginable (like airport toilet floors) and then innocently and unconsciously placed on desks and even kitchen countertops, which you EAT from! No wonder so many people are sick and health care costs are skyrocketing.

FREQUENTLY ASKED QUESTIONS

What are Oxyions™?

Oxyions™ are a carefully crafted proprietary blend of Negative Ions and Activated Oxygen, produced in the same proportions and quantities as found in the best of nature. This effectively brings the benefits of fresh clean country air inside, without energy loss or security risks. It's like opening a window after a cleansing lightning rain storm... electronically! The Activated Oxygen (O3) portion is nothing more than natural Oxygen (O2) with an additional Oxygen atom, created by a high electric charge (as in lightning). In nature it is produced by the sun's ultra-violet rays, waterfalls, ocean waves and associated with thunderstorms. It leaves you with the fresh, clean, natural smell associated with a thunderstorm and the passing of heavy rain. As is the case of most Activated Oxygen Generators, Activated Oxygen (O3) is created by a high voltage (but relatively harmless, due to low amperage) electrical spark corona discharge that occurs safely within the unit.

How Do Oxyions™ Work?

As in nature, Negative Ions and Activated Oxygen work synergistically to purify our world. The Activated Oxygen (O3) portion has an extra Oxygen atom which is unstable and therefore, instantly seeks out microorganisms such as viruses, molds and bacteria, chemicals, odors and other materials that will assist in oxidation and help it turn back to its original form, Oxygen (O2)! As it finds these agents, it will bind to them, oxidize them and eventually leave behind only pure Oxygen (O2).

Are Oxyions™ Harmful?

Negative Ions are not only completely safe, they are essential to a healthy life. The Activated Oxygen portion, at the levels emitted by the CatMouse™, are completely safe, as in nature, when used as directed. The Maximum Acceptable Concentration (MAC), as established by OSHA, is 0.10 PPM for 8 hours per day, 5 days a week.

Activated Oxygen can be an irritant in very high concentrations. The CatMouse™ has an Activated Oxygen Output of only .01 to .04 ppm - well below FDA, EPA, OSHA and NIOSH limit standards or even output of a lightning storm. You can rest easy knowing your CatMouse™ is not only completely safe for you and your pet(s) and will help you maintain better health in a cleaner, more odor-free, pathogen-free environment. A good rule of thumb is that if you can smell Activated Oxygen coming from the unit at a distance of 3-5 feet you should reduce the setting. Detecting only a faint smell, or none at all, is typically a safe level.

What is the Life of Activated Oxygen?

Nature's Activated Oxygen has a half-life of about 30 minutes, meaning it reduces itself by half about every 30 minutes. The CatMouse™ deodorizes "Purrfectly" because it completely destroys all odors, germs, viruses, bacteria, mold, mildew and most pollutants, and the only remaining byproduct eventually, is Oxygen! Activated Oxygen quickly starts to revert to pure Oxygen in about 30 minutes, leaving no toxic residues or pollutants behind. Initial half-life reduction is fast because the concentrated Activated Oxygen will immediately start attaching itself to pollutants, odors and microorganisms, destroying them in the process. Whatever "residual Activated Oxygen" remains, reduces at a slightly slower pace, about every 30 minutes. Any remaining residual Activated Oxygen can also be quickly dissipated by simply "airing out" the item and/or area at any time, if desired.

Why is the CatMouse™ so superior to air fresheners and cleaners?

The CatMouse™ attacks the problem instantly on the molecular level, just as nature does, completely eliminating the chemicals causing the odors, as well as hygienically killing germs, bacterias, molds, mildews and fungus in the entire area including all surfaces, crevices, carpets and more!

Aerosol Sprays and plug-in deodorizers create more pollutants than they cover up, by adding even more toxic allergenic chemicals into your home and on your possessions. They also cost an ongoing, exorbitant amount of money to use and contribute to the ever increasing landfill problem. They are bad for you and bad for your environment!

Fan Driven Air Filters. Only the air driven through the noisy, energy-consuming fans is filtered and cleaned. Even charcoal filters do not kill and remove a fraction of the pollutants and toxins the CatMouse™ can. The CatMouse™ cleans, deodorizes and disinfects the entire area and everything within it, only leaving behind nature's oxygen! It's Nature's Greenest Miracle.

Effectively removes Allergens and other Pollutants

Oxyions™, a precise proprietary combination of natural Activated Oxygen (O3) and beneficial high Negative Ion concentration produced by CatMouse™, effectively and most economically removes just about any type of airborne pollutant.

High Density Negative Ion Output

The CatMouse™ utilizes 3 corrosion-resistant stainless steel needlepoints to generate a high concentration of healthy, mood-lifting healthy Negative Ions. The needlepoint ionization system provides the highest level of beneficial, healthful Negative Ions in comparison with other methods.

List Of Pollutants Removed By OXYIONS™

ACTIVATED OXYGEN O ₃		NEGATIVE IONS
All Odors/Fumes	Nicotine	Solid Air Particles
Germes	Acrylic	Animal/Pet Dander
Viruses	Chemicals & Their Odors	Bacteria/Microorganisms
Mildew	Acid Odors	Insect Feces (Allergenic)
Bacteria (including MRSA)	Gases/Fumes	Dust
Staphylococcus	Benzene	Pollens
E-Coli	Ammonia	Mold Spores
Fungi	Mold/Mold Spores	Chemical Precipitants
Cigarette Smoke	Fertilizer Chemicals	Volatile Organic Compounds (VOCs)
Algae	Oils	
Formaldehyde	Resins	
Exhaust fumes	Carbolic Acid	
Carbon Monoxide	Propane	
Tetrachloride	Ether Alcohol	
Dust Mites (Oxydizes their food source-- human skin cells)	Industrial Waste	

Long Lasting, Durable

Because the CatMouse™ needlepoints are constructed of surgical stainless steel, they resist corrosion unlike other needlepoints typically made of less durable materials. A typical needlepoint will erode and produce only a low level of ion after the initial few months of operation. Stainless steel needlepoints will continuously provide a consistent level of high ion output for the life of the unit.

Built to last!

Only simple routine maintenance is required for optimal results.

Whisper Quiet Operation

The CatMouse™ deodorizing unit is virtually silent, even when selecting the Fan BOOST mode (activating the Fan and HI Oxyion™ output). **Please Note:** The oxygen emitter may produce a faint hissing sound while operating - this is normal. Humidity and dust can be a factor – clean emitter and gently reinsert (see maintenance instructions on page 13).

Compact and Stylish

The small dimensions, attractive design and unobtrusive composition of the CatMouse™ make it easy to place anywhere! The exterior smooth, stealth, graphite color finish, complements any interior decor.

Saves Time, Money & Landfills

The CatMouse™ requires little maintenance and virtually no replacement costs! Due to minimal power consumption, it only costs pennies to run the CatMouse™. It will replace many very expensive, even toxic, household deodorizers, polluting air fresheners and the time and costly expense needed to purchase them. Over the course of a year, you could save hundreds of dollars, and produce no landfill waste! Nature's Greenest Deodorizer.

Natural, Clean Scent while Eliminating and Destroying Odors

The combination of Ionization and Activated Oxygen results in a fresh, clean, natural air smell as found in the great outdoors—especially after a thunder/rain storm—while consuming, destroying and neutralizing odors, fumes and other unhealthy chemical compounds.

Oxyions™—Safe Activated Oxygen Output

Only the required, effective minimal amount of Activated Oxygen (O3) is produced by the CatMouse™, just as in Nature, making it safe to operate, even in small areas. It operates well below the U.S. FDA limits of below .05 ppm output level, as well as the OSHA, EPA, and NIOSH health limit standards.

HEALTHY STRESS-REDUCING NATURAL IONS**RELAX PETS AND OWNERS ALIKE****Can Help Increase Comfort, Relaxation & Maintain Alertness**

Scientific studies show that the adrenaline levels are lower in the presence of Negative Ion conditions for man and animals alike.

Can Improve Disposition, Stamina and Stress Levels

Superior clean, high Negative Ion air quality as produced by the CatMouse™ Oxyions™ can improve your and your pets health, energy and mood. At Yosemite Falls, one may experience over 100,000 Negative Ions per cubic centimeter. This is far from the meager 100 Negative Ions per cubic centimeter found in many polluted air tight, homes of today.

The high Negative Ion concentration and Active Oxygen produced by the CatMouse™ effectively removes just about any type of airborne pollutant. This includes allergens, chemicals, odors, bacteria, viruses and many other types of pathogens and compounds. There are endless benefits and features to having a CatMouse™ in your home and in your life:

- Naturally kills odors without toxic waste, cost, cover-up scents or fragrances. Nothing left behind but oxygen! Even eliminates toxic smoke!
- Safe Oxyion™ output with a fresh, natural, sweet, clean smell
- Whisper quiet operation in any mode (*a faint hissing sound is normal*)
- Ultra-low energy-saver 3 watt power consumption (half that of a nightlight)
- Exceptionally high, beneficial and air cleansing Ion output
- Stylish low profile, compact design in a versatile, attractive stealth graphite color finish
- Place anywhere! Generous 5 ft. safe, low voltage power supply cord allows convenient, safe and versatile placement
- Low maintenance, durable stainless steel corona discharge generator
- Activated Oxygen/Ion generating needle point emitter.
- Includes 120VAC Power Supply Adapter, BOOSTER mode, repositionable mounting strips and complete Instruction & User Guide

⚠ DANGER: Keep away from water sources including rain, bathtubs, sinks and pools.

- 1) Plug 120VAC power adapter into wall outlet.
- 2) Connect the other end of cord into the bottom jack of the CatMouse™ unit.
- 3) Press the "ON/OFF" button once (fig. 1). The green LED power indicator will light up indicating the unit is activated and ready to work properly, after selecting the desired function.

figure 1

- 4) To adjust level of odor elimination, locate top edge of unit. Find the "LOW/HI/BOOST" switch (fig. 2).

- **LOW** Push switch to left for the LOW mode which emits intermittent Oxyions™ in approximately one minute on/one minute off intervals, for moderate full time odor control.
- **HI** Push switch to center for the HI mode which emits the units maximum amount of Oxyions™ for full time routine daily odor control.
- **BOOST** Push switch to far right for the BOOST mode, which activates the Fan AND HI Oxyion™ output to eliminate severe odor problems quickly for a 12-24 hour period.

figure 2

- 5) Press the "ON/OFF" button again to turn off the unit. Press again to turn on unit in the pre-selected mode as desired.

6) Mounting your CatMouse™:

Option #1 *Keyhole Mounting:*

a) Tap in pin/nail provided. Place the keyhole at the back of the CatMouse™ unit over the nail (fig. 3).

b) Drill/punch a 3/16" hole in desired mounting location. Press anchor firmly into hole. Turn in the screw leaving approx. 1/4" of the screw extending from the wall. Place the keyhole at the back of the CatMouse™ unit over the screw (fig. 3).

Option #2 *Repositionable Hook & Loop Mounting Strip:* Separate opposing repositionable mounting strip sides. Remove adhesive backing paper from one side and attach to desired location. Remove adhesive backing paper from other side and attach to the CatMouse™. Secure unit to desired location (fig. 4).

Note: Do not cover keyhole or labels with mounting strips.

figure 3

figure 4

7) Litter box Installation Options

NOTE: Oxyions™ are heavier than air and migrate downward, thus it is necessary to place the CatMouse™ higher than the object or area you are deodorizing and disinfecting.

OPEN LITTER BOXES:

- A. Simply mount the CatMouse™ about 2-3 feet above and near (within 2 feet) open litter box (fig. 5).

figure 5

COVERED LITTER BOXES:

WARNING: If placing on top of a covered litter box, removal of litter box access door is highly recommended.

- A. Mount the CatMouse™ on top of covered litter box near opening (fig. 6).

figure 6

DANGER: Litter box access door must be removed for adequate ventilation.

figure 7

- B. Mount the CatMouse™ on vent opening on top of some covered litter boxes making sure there is adequate space surrounding the CatMouse™, allowing air flow of Oxyions™ into vent openings, if available (Fig. 7).

Every one to three months, check and clean stainless steel emitter and cover as necessary.

! DANGER: Always unplug the CatMouse™ unit before performing any maintenance.

1) Unplug the CatMouse™ unit.

! CAUTION: Never use solvents or harsh chemicals to clean any portion of the CatMouse™.

! CAUTION: Edge of emitter may be sharp.

2) Simply lift emitter access cover vent grill at finger recess area and remove (fig. 1). Brush and/or rinse off grill area as required. Always thoroughly dry vent grill before reinstalling.

3) Lift out stainless steel emitter by pulling straight up and out (fig. 2). Gently brush, scrape, wipe and/or rinse (fig. 3). Always dry emitter thoroughly before reinstalling. Carefully re-align emitter with indentations on each side and reinstall GENTLY by pushing on each end, not in the middle as this may bend the emitter.

4) Reinstall emitter access cover vent grill.

NOTE: Tab on grill and accommodating slot on CatMouse™ (fig. 4).

figure 1

figure 2

figure 3

figure 4

⚠ DANGER: Keep the CatMouse™ unit itself away from water sources including rain, bathtubs, sinks and pools.

figure 5

- 5) Plug in unit, turn power switch to ON (fig. 5). Select LOW/HI/BOOST position. An ionic breeze can also be felt from the top vent while in operation, as well as, the presence of a sweet, fresh fragrance.

⚠ WARNING: Do not directly inhale the Activated Oxygen within 24 inches (60.96 cm) for extended periods of time (such as during sleep). Mount 2-3 feet above pet sleeping area.

⚠ WARNING: If the smell of Activated Oxygen can be detected at a distance of 3-5 feet from the unit it is necessary to lower the volume of output.

NOTE: To keep your CatMouse™ unit operating at absolute peak performance in heavy, constant use on HI, we recommend inspecting and cleaning it monthly as needed.

figure 6

The CatMouse™ utilizes the latest state-of-the-art technology and digital, micro electronic circuitry, to produce high quality, high output, reliable safe results. (figure 6)

- Oxyion™ Production:** 100,000 ions per cubic cm at 25 cm (9.84 in.) distance
- Negative Ionizer:** Needlepoint ionization (highest ion-producing method available) using surgical stainless steel electrodes (to prevent corrosion and provide long life)
- Activated Oxygen (O3) Portion Output:** .01 to .04 parts per million similar to fresh, clean outside forest air and well below FDA Limit Standards of .05 ppm and EPA Limit Standards of .08 ppm per 8 hour interval, less than half of OSHA Limit Standards of 0.10 ppm per 8 hour interval and NIOSH Limit Standards of 0.10 ppm limit, and is lead free RoHS compliant
- Natural Byproduct of Needlepoint Ionization:** Activated Oxygen (O3) then Oxygen (O2)
- Half-life of Activated Oxygen (O3):** Approximately every 30 minutes, 50% of the Activated Oxygen (O3) produced converts to pure oxygen (O2). Remaining residual Activated Oxygen (O3) will continue to be reduced in half about every 30 minutes.
- Adjustable Settings:** LOW/HI/BOOST

Electrical:	12VDC from 120VAC power supply adapter. Optional 12VDC vehicle adapter and 220VAC sold separately.
Cord Length:	6' 3" (1.91 m)
Power Consumption:	Energy saving .05 watt max. in LOW mode, 1 watt max. in HI mode and 4 watt max. in Fan BOOST mode with 120VAC power supply adapter.
Dimensions:	2"(50mm) H x 3.5" (90mm) W x 5.5" (140mm) L
Weight:	6.3 oz. (180 g)
Enclosure:	Environmentally safe, tough, corrosion resistant, ABS & PVC plastics
Warranty:	See full warranty on following page
